BRILLIANT IDEA!

## ILLUMINATING SHUTTERS

**N**ow available in the USA and Canada, Radiant Shutters™ don't need a window to create a bright window effect. Each louver contains powerful, solid state lighting technology of its own! Mount the shutter on a windowless wall or in any window opening for a lighted window effect.

Dim the light to nurture a sensation of peace and security, or inspire romance. Brighten them to create excitement or chase away the winter blues.

Radiant Shutters incorporate energy saving, LED lighting which lasts up to 50 times longer than a typical light source, never needs replacement, and consumes less than half the electricity with no maintenance, ever.
